SUMMARY

I'm a Software Engineer with 5+ years of experience in backend development, enterprise applications, government automation systems, and high-traffic platforms. Skilled in **PHP**, **Laravel**, **Java**, **Spring Boot**, **REST APIs**, **MySQL**, **PostgreSQL**, **Redis**, **Docker**. Experienced in designing scalable solutions, API integrations, microservices, and financial systems. Currently working at Synesis IT PLC, contributing to government projects.

PROFESSIONAL EXPERIENCE

Synesis IT PLC

Aug 2025 - Continue

Software Engineer II

- Participating in development using **Java Spring Boot**, **Oracle**, and **REST APIs**.
- Working on the Jibon Bima Corporation (JBC) ERP project in House Building Loan Module
- Integrated external government services including BIDA, BSW, and Bangladesh Bank for license validation, payment processing, and data synchronization.

Adventure Dhaka Limited

April 2023 - July 2025

Software Engineer

- Developed and optimized scalable backend APIs for **Skyticket**, a high-traffic booking platform.
- Worked with **Laravel**, **CakePHP**, **Vue.js**, **MySQL**, **Redis**, and **REST/SOAP** to enhance performance
- Designed **microservice**-based architecture (**HLD/LLD**, **ERD**), enforced clean coding (**PSR-12**), and implemented **Redis caching with Nginx load balancing** for faster response times.
- Conducted **code reviews**, enforced **PSR-12 standards**, and developed **PHPUnit test cases**.
- Integrated **load balancing** (Nginx) and **Redis caching** for performance optimization.
- Collaborated with **Japanese teams** to deliver multilingual, cross-regional platform support.

Dream71 Bangladesh Limited

September 2020 - March 2023

Software Engineer (PHP)

- Built backend solutions for **e-learning platforms**, **government portals**, **enterprise applications**, **multi-vendor ecommerce with Laravel**
- Led API development and system integration for major **government and International clients**.
- Connected systems to **Google BigQuery** for large-scale data processing and analytics.

TECHNICAL SKILLS

Languages & Frameworks : **PHP**, **JAVA**, **JavaScript**, **Laravel**, **Spring Boot**, **Vue.js**

Databases: **MySQL**, **PostgreSQL**, **Oracle**

Testing: **PHPUnit**, **Integration**, **Regression**, **System Testing**

Tools/Platforms: **Docker**, **Git**, **Linux**, **Jira**, **CI/CD pipelines**

Architecture: **MVC**, **Microservices**, **Repository Pattern**, **SOLID Principles**, **Design Patterns**

Others: **Postman**, **Swagger RESTful**, **SOAP API**, **Load Balancing**, **Scrum**, **Sprint Planning**

Cloud: **Google Cloud Platform (GCP)**, **DigitalOcean**, **AWS (EC2, S3, SQS, SES)**

Message Broker: **Redis**, **RabbitMQ**

API Development: **REST API**, **SOAP API**, **Swagger/OpenAPI**

EDUCATION

B.Sc in Computer Science & Engineering

Uttara University

CGPA 3.15

PROJECT

Jibon Bima Corporation – Insurance Management System (Government Project)

Role: Backend Engineer

Tech: Java, Spring Boot, Oracle/PostgreSQL, REST API

- Implemented loan lifecycle management: application, approval, disbursement, and repayment
- Built salary-based loan deduction system integrated with payroll
- Designed APIs for loan summary, installment schedules, and transaction history
- Ensured financial accuracy in EMI calculations, interest handling, and outstanding balance tracking

OLM – Online Licensing Module (CCI&E, Government of Bangladesh)

<https://olm.ccie.gov.bd>

Integrations: BIDA, BSW, Bangladesh Bank

Tech: Laravel, MySQL, Redis, Vue.js, Docker, Git, Nginx

- Integrated BIDA, BSW, and Bangladesh Bank systems for data validation, payment, and license synchronization.

skyticket

<https://skyticket.jp> & <https://skyticket.com>

Skyticket – Global Travel Reservation Platform

Tech: Laravel, CakePHP, Vue.js, Redis, MySQL, Docker, Git

Team Environment: Scrum (Agile), Cross-functional teams (JP/BD/KR/IN)

- Designed and maintained RESTful APIs for flight, hotel, and car rental bookings.
- Collaborated with international teams (Japan, Korea, India) for feature rollouts.

Digital Work Platform (UNDP Project)

<http://dwp.migrantnation.org>

Digital Work Platform – Freelancing Marketplace for Refugees (UNDP)

A job portal for displaced individuals in Turkey.

Tech: Laravel, MySQL, Cron Job, REST API

- Built job crawler to fetch jobs from Fiverr, Guru, PeoplePerHour using scheduled jobs.
- Implemented rate-limiting and retry strategies to prevent API overload
- Managed user roles, profile matching, job alerts.
